

EAGLES NEST PROPERTY HOMEOWNERS ASSOCIATION
Noxious Weed Spraying Program Report 2022

The weed mitigation program at ENPHA allows all 800+ homeowners to participate. This is a large project and encompasses homes on both sides of Highway 9.

Every year we go out for bid and Niels Lunceford has been the lowest bid, with the most environmentally friendly products to meet our needs. Pets can be allowed to romp outside 24 hours after the property has been sprayed.

When we spray we will announce the schedule with small yellow signs. Small yellow flags are placed on properties after spraying. There are two sprayings per season and daily schedules are dependent on weather and wind.

Every homeowner can “opt out” of the spraying program; however each homeowner is still required to remove weeds on their property in order to meet requirements.

More details will be available at the March meeting and specific questions can be addressed at that time .
